WHAT'S NEW FROM VENDORS?

Cisco Catalyst Industrial Routers Portfolio Extends the Power of the Enterprise Network to the Edge

Cisco announced a new portfolio of Catalyst industrial routers to extend the power of the enterprise network to the edge with the flexibility, security and scalability needed for IoT success.

Cohere Technologies Partners with VMware to Help CSPs Improve Network and Spectrum Efficiencies

As communication service providers (CSPs) move to open radio access network (O-RAN) architectures, the door to innovation opens. Partnering to accelerate this innovation, Cohere Technologies and VMware announced they are developing an O-RAN solution to help CSPs improve network and spectrum efficiencies and deliver new and differentiated services and experiences for their customers.

Wipro and Oracle Collaborate to Help Organizations Migrate to the Cloud

Wipro announced it is collaborating with Oracle to launch Wipro Zero Cost Transformation, a new offering that helps organizations migrate to the cloud. Wipro is a member of Oracle PartnerNetwork (OPN). As enterprises seek to generate value from the cloud, their journey is often hindered by excessive costs, ineffective implementations and slow processes.

SOMETHING TO THINK ABOUT

WHAT'S NEXT?

Strengthen Your Password Policy With GDPR Compliance

A solid password policy is the first line of defense for your corporate network. Protecting your systems from unauthorized users may sound easy on the surface, but it can actually be quite complicated. You have to balance password security with usability, while also following various regulatory requirements.

What's Making Your Company a Ransomware Sitting Duck

What's the low-hanging fruit for ransomware attackers? What steps could help to fend them off, and what's stopping organizations from implementing those steps?

What Is a Security Operations Center (SOC) and Why Organizations Need It?

Data breaches are costing organizations millions of dollars on average. In its 2020 Cost of a Data Breach Report, IBM found that a data breach cost the average organization \$3.86 million.

What is the True Meaning of SASE?

The adoption of SASE has skyrocketed during the pandemic, according to a research conducted by Sapio Research. Thirty-four percent of businesses claim to already be adopting SASE in the past year, and an additional 30 percent plan to do so in the next six to 12 months.
